"Be the change you want to see in the world."

Summary

Mechatronics Engineer with experience in design and improvement of automated processes, innovation of equipment and production systems using computer-aided design software to develop and test potential solutions. Proven skills in CAD/CAM/CAE, mechatronic design, PLC, embedded systems, programming, design of machine elements, integrated manufacturing systems. Additionally, he spends his free time in the research of trending and emergent technologies and its future applications in the country.

At the present time, he is actively looking forward to expand his knowledge, improve his skills and obtain experience related to the development of industrial solutions with a local and global focus.

Projects

INDEPENDENT DEVELOPER

Quito, Ecuador
April 2019

- Improve your design!
- Ongoing open source project hosted on GitHub

Syder Ideas
INDEPENDENT DEVELOPER

Quito, Ecuador
January 2019

- Manage your ideas!
- Stores all data in a **PostgreSQL** database
- Ongoing open source project hosted on GitHub

Experience

Web Developer
INDEPENDENT WORK

Quito, Ecuador
April 2018 - Current

- Redesign of Asociacion Ecuatoriana de Franquicias website.
- Redesign of Ecuafranquicias website.
- Redesign of Villagran Lara Asociados website.

Project Manager
ECUAFRANQUICIAS

Quito, Ecuador.
June 2017 - April 2019

- Franchisable business's operative and administrative processes documentation and management.
- Part-time job based-on time availability.

Research and Teaching Assistant of: Computer-aided Design, Manufacture and Engineering subject (CAD, CAM, CAE)
DEPARTMENT OF ENERGY AND MECHANIC SCIENCES - ESPE

Quito, Ecuador
Nov. 2015 – Mar. 2016

- Modelling, analysis and manufacture of a vehicle-based RIN.
- Out-come report generation, elaboration of processes sheets, G-code programming, design of the vehicle-based RIN using computer-aided software, strain simulation and post-process of the manufacturing operations.

Undergraduate Researcher, Manufacturing Processes Lab. *Quito, Ecuador.*
ARMY FORCES UNIVERSITY - ESPE *Jan. 2015 - Mar. 2015*

- Design and development mechanism for mobile robots mechanisms using 3D printing and laser cutting techniques.

Education

PyTorch Scholarship Challenge from Facebook *Online*
UDACITY *Nov. 2018 - Jan. 2019*

- Used Pytorch, Jupyter
- Trained a deep neural network to detect distracted driver
- Trained a deep neural network to classify 102 species of flowers

International Exchange Student *Brandenburg an der Havel, Germany*
TECHNISCHE HOCHSCHULE BRANDENBURG *March - Sept. 2016*

- Development of thesis project: *"Implementation of HIL/SIL simulation techniques for real-time tests of vehicle models using the DSPACE platform"*
- GPA: A-
- System modelling | Vehicle dynamics | Embedded systems

Bachelor of Science (B.Sc.), in Mechatronics Engineering *Quito, Ecuador*
ARMY FORCES UNIVERSITY - ESPE *Apr. 2011 - Feb. 2016*

- GPA: 17.43/20
- Industrial Robotics | Mechatronic Automation | CAD/CAM/CAE
